臺灣防災產業協會
Taiwan Association of Disaster Prevention Industry

Purpose

The purpose of the Taiwan Association of Disaster Prevention Industry (TADPI) is to engage and integrate the domestic and International disaster prevention related industry chain actively. TADPI attempted to expand the demand and create the new markets worldwide, and promote the disaster prevention technologies that belong to our members. Officially founded on 31 March 2013, the TADPI coordinated organizations and experts in different field and technology related to disaster prevention, such as hazard modeling and simulation, engineering practices, risk management and insurance, geospatial information, monitoring and communications, security and safety, and firefighting. Through the promotion of the relevant businesses, public awareness and adaptability can be strengthened when facing a catastrophe. Furthermore, advocating the strategy of climate change adaptation, formulation of a Business Continuity Plan (BCP) for the cooperation, and to facilitate and building resilient and sustainable societies worldwide. That should be the ultimate goal of TADPI.

Goal and Mission

- To integrate the disaster prevention technology, and upgrade and extend practical aspects of them.
- To integrate the chain of different areas in the domestic disaster prevention industry, furthermore, to promote and expand both domestic and international markets and create business models.
- To hold the seminars, exhibitions, communication workshops, and advocacy efforts relevant to the disaster prevention industry. To participate in international activities relevant to the disaster prevention industry.
- To conduct disaster prevention research program and project supported by the public or private sectors, and as well as to provide a professional consulting service.
- To implement the Disaster Response System more practical and feasibility
