

Organization

Transdisciplinary Approach
Public Private Partnership
Intentional Cooperation

Purpose

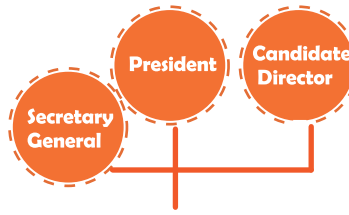

The purpose of the Taiwan Association of Disaster Prevention Industry (TADPI) is to engage and integrate the domestic and International disaster prevention related industry chain actively. TADPI attempted to expand the demand and create the new markets worldwide, and promote the disaster prevention technologies that belong to our members. Officially founded on 31 March 2013, the TADPI coordinated organizations and experts in different field and technology related to disaster prevention, such as hazard modeling and simulation, engineering practices, risk management and insurance, geospatial information, monitoring and communications, security and safety, and firefighting. Through the promotion of the relevant businesses, public awareness and adaptability can be strengthened when facing a catastrophe. Furthermore, advocating the strategy of climate change adaptation, formulation of a **Business Continuity Plan (BCP)** for the cooperation, and to facilitate and **building resilient and sustainable societies worldwide**. That should be the ultimate goal of TADPI.

Goal and Mission

1. To integrate the disaster prevention technology, and upgrade and extend practical aspects of them.
2. To integrate the chain of different areas in the domestic disaster prevention industry, furthermore, to promote and expand both domestic and international markets and create business models.
3. To hold the seminars, exhibitions, communication, workshops, and advocacy efforts relevant to the disaster prevention industry. To participate in international activities relevant to the disaster prevention industry.
4. To conduct disaster prevention research program and project supported by the public or private sectors, and as well as provide a professional consulting service.
5. To implement the Disaster Response System more practical and feasibility.

2017 The Organization Chart of the 2nd TADPI

Earthquake Disaster Prevention Committee

- Promote Earthquake Early Warning System.
- Assessment Seismic Hazard, Risk and Social Impact.

Insurance and Enterprise Risk Management Committee

- Promote the Natural Disaster Insurance Policy.
- Promote the BCP/BCM Related Technology.

Climate Change Adaptation Committee

- Facilitate International Climate Change Adaptation.
- Develop the Weather Industry.

Disaster Monitoring and Geospatial Information Analysis Committee

- Promote Geospatial Information Technology.
- Promote the Open Geospatial Consortium.

Disaster Prevention Communication Technology Committee

- Formulate the standards of Disaster prevention communications technology.
- Promote Telecommunication and Internet of Things(IOT).

Medal Committee

- Formulate disaster prevention services and commodities selection mechanism.
- Promote good services and commodities of disaster prevention industry.

Disaster Prevention Industry Output Committee

- Communicate with Disaster Prevention Related International Organizations.
- Organising Exhibitions and Forums.
